

> what a fantastic year!

JANUARY 4

Company Review Day @RGS

Welcome to RGS insite issue 10

Our regular newsletter celebrating more than a decade of drilling, keeping you up to date with RGS and industry news.

Rogers Geotechnical Services Ltd are site investigation specialists offering ground investigation and geotechnical services to developers, builders, structural and consulting engineers, architects, insurance companies, local authorities, piling and foundation engineers, private individuals and other geotechnical consultants.

New year heralds company review

As part of our **forward business planning**, we held a highly successful, annual company review on Monday, January 4 - the first working day of the year...

As well as outlining the **highlights and challenges** of the past year company year, we also **looked ahead** and reinforced our priorities and objectives for the months ahead and focused on our many areas of good practice and identified any areas for improvement.

One of the highlights was our **Health and Safety review**, carried out by our retained consultant, **David Toulcher**.

RGS MD **Emma Lewis** said,

"I'm delighted to confirm that 86% of our staff passed the test with **Distinctions** and the remaining 14% achieved **Merits**.

Particularly satisfying is that **Chay Rogers** got a **perfect, 100% score** - highly fitting for an Ops Director!"

The Company Review Day also included presentations to the fieldwork team outlining **good practice** in a number of vital areas - including **working at heights**; **asbestos handling**; and **identifying buried services**.

Do you need a phase one environmental desk study report?

JOBFILE: CUMBRIA DECEMBER 2015

48 hour flood response

RGS mobilised a drilling rig (pictured below) in record time just before Christmas, following an SOS from a major consultancy in response to the Cumbrian floods.

RGS MD **Emma Lewis** said,

"We were contacted on Friday and I am delighted to say that we were onsite by Tuesday, **working in response to the shocking floods** that devastated parts of the North.

A road was **washed away in Thirlmere** and it was **imperative that we acted swiftly** to support the clean-up operation, particularly as a 100-mile diversion was in place due to the road closure.

We saw the devastation on the BBC News and I am delighted that we were able to mobilise so quickly and efficiently."

CLIENT FEEDBACK

We had the following **client feedback**, which says it all:

"Thank you very much for the speedy response to the work at Thirlmere and please give special thanks to **Alan and Wal** (left and right above) for the efforts they put in to complete the job. In spite of it all, they remained calm and professional, even cheerful!"

NEW YEAR - NEW SERVICES

Soakaway Design and Testing

RGS is delighted to confirm that we are now offering a new service to our clients, after investing in state of the art new software.

As well as continuing to undertake soakaway testing, we are also offering a soakaway design service.

Our service is based on a competitively priced and highly professional approach - with mobilisation to site within 7-10 days and issue of a design within the month.

A factsheet is being prepared, outlining this new service and will be added to the downloads section of the RGS website shortly.
